Next download device control

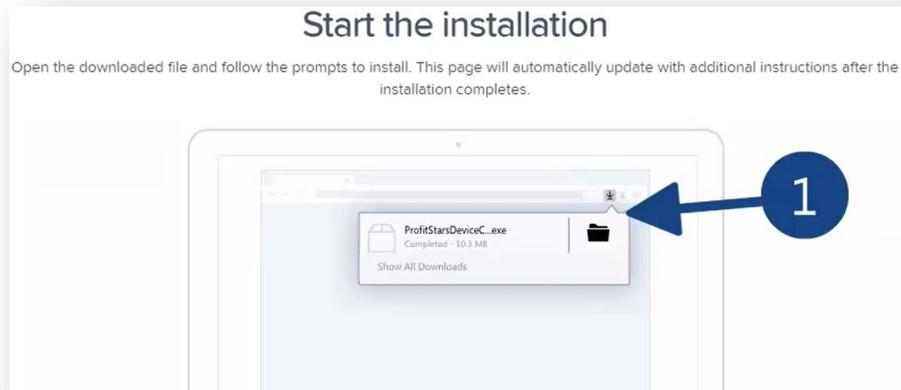

Getting Started with a Check Scanner

Device Control pairs a check scanner with this page, providing a faster experience using any EPS-supported browser. Download and install our new **Device Control** to get started.

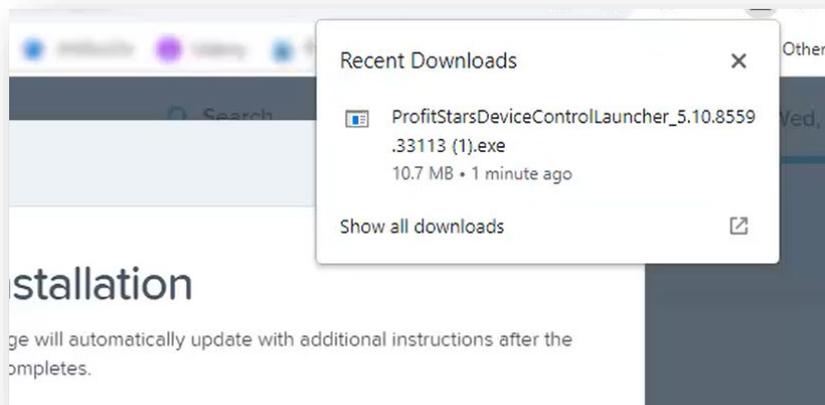

- 
1 Download
- 
2 Install
- 
3 Add your scanner

[Download Device Control](#)

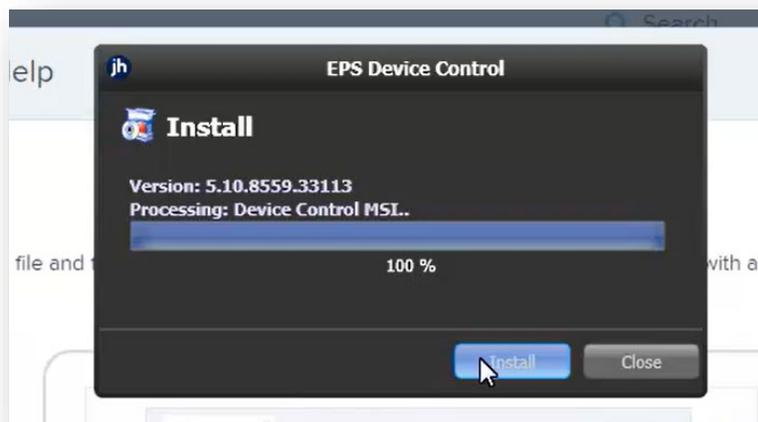

The file will download as usual for your specific browser

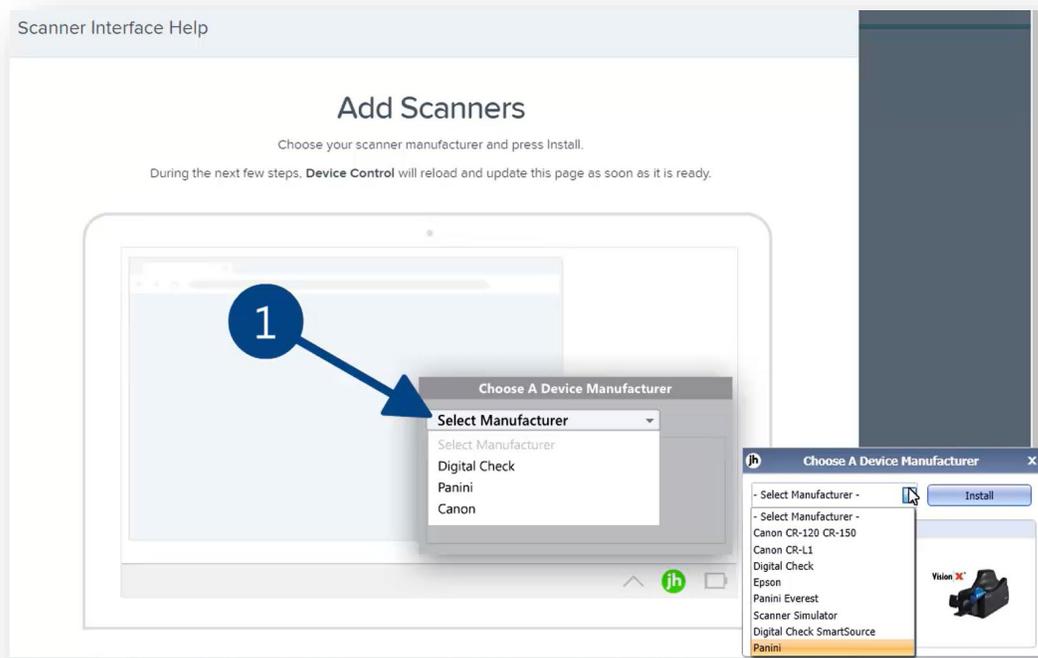

You may see a download bar at the bottom of the screen or a download bubble at the top right- After the download completes click on the installer to run it

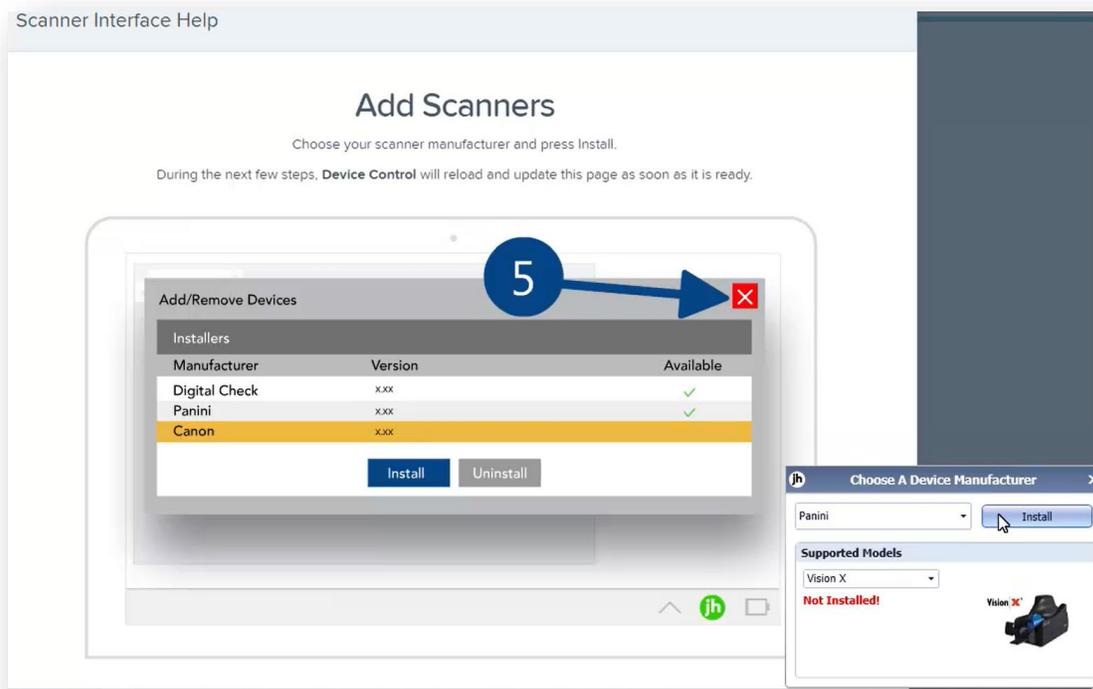

The EPS device control installer appears- Click install.

Now we will install scanner drivers for the make and model of the scanner- using the drop-down menu select the manufacturer of your scanner

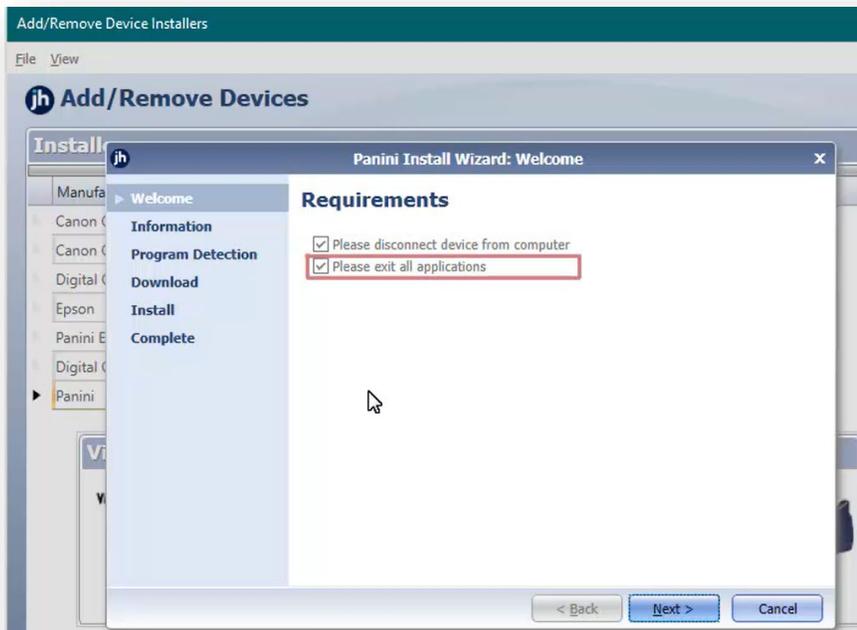

Select your scanner model- we see that the scanner driver is not yet installed for the model- select install

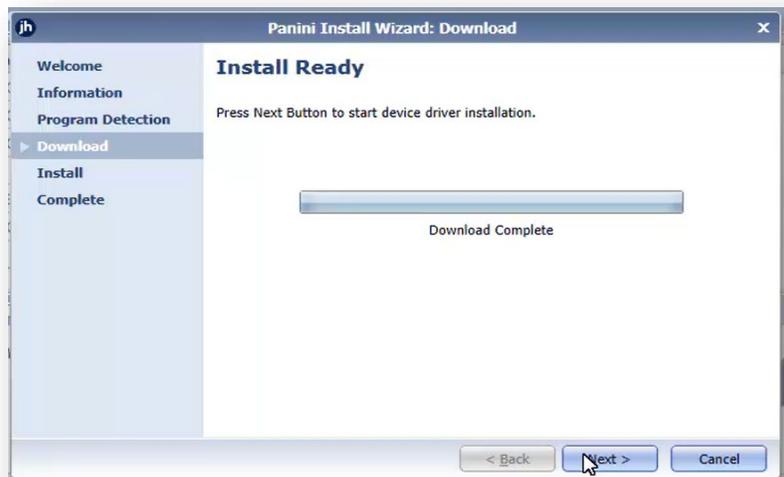

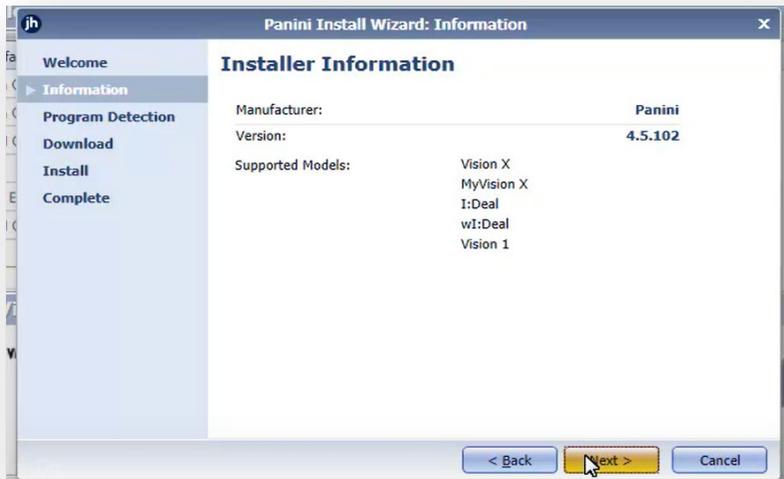

Select your scanner from the list of installers

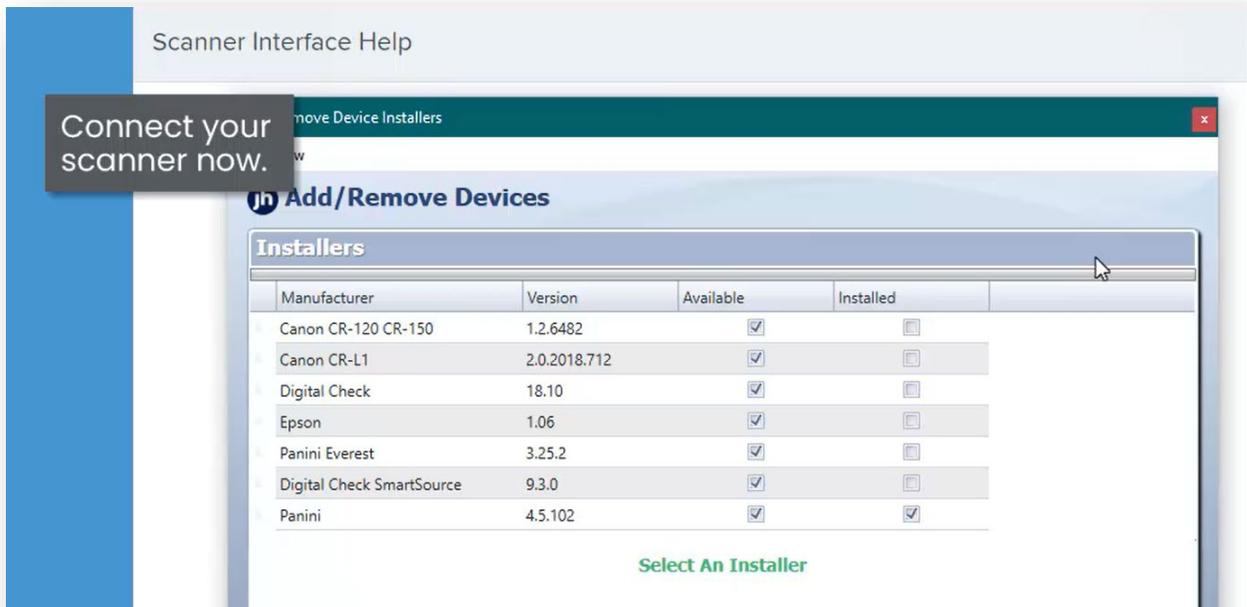

The scanning device is not yet connected to the computer at this time, we need to exit all applications so we will log out of smart pay business and close all browsers.

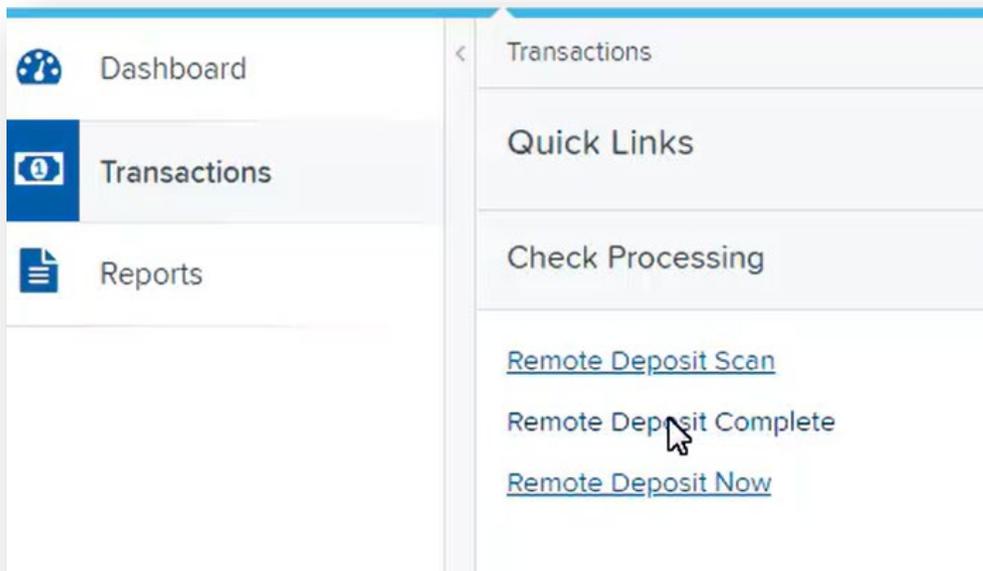

Click as required to complete installation

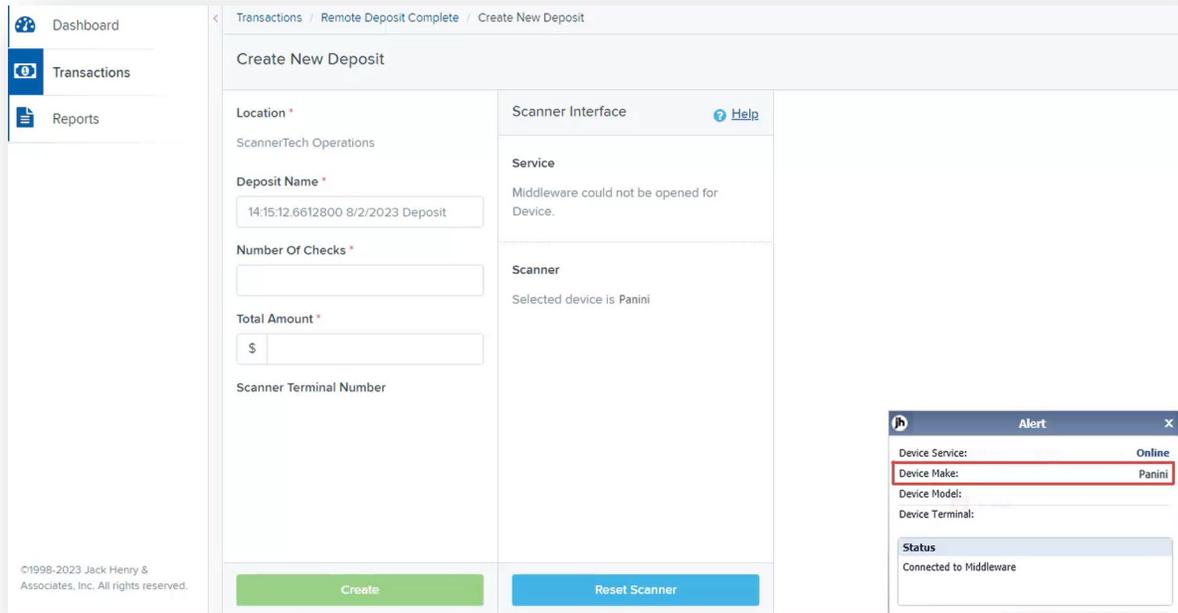

The installation is completed successfully- connect your scanner

After logging back into Smart Pay Business- the smart pay dashboard appears- On the left of the navigation panel select Transactions- Select Remote Deposit Complete under check processing

The device driver is loaded, the scanner is recognized, and the terminal serial number appears- You are now ready to start processing checks

Dashboard / Transactions / Reports

Transactions / Remote Deposit Complete / Create New Deposit
